Profile

Originally from Manchuria, China. finishing Le Wagon full-stack web dev course has made me a web developer. I did various kinds of work while **working for Israeli startups for 3 years** providing realiable support for a billion-dollar business, bridging between different departments of dozens, offering solutions for various problems. Now I could provide more value with tech skills.

Projects

Self Portfolio - Design & Frontend

www.sencao94.com

UI/UX self designed with Figma

Built with React and various libraries

Fully self project from beginning to the end

Two other self frontend projects embeded here

Shared Goal - Design & Fullstack

www.sharedgoal.org

Web-app for easily finding buddies to learn skills together

Planned and overviewd this Rails project with a team

Designed schema for the web app MVC structure

UI Designed with Figma and transformed the design to HTML and Sass/Javascript

Generated 3 modals and implemented the controllers for them, worked on routes, seeds, managed data with Active Record

Cooperated as a team and pushed to Github and implemented to Heroku regularly

Delivered the final live pitch successfully

Work Experience

Sonovia Ltd

Ramat Gan, Israel

2019 - 2022

Worked in a team of dozens, managed to provide support to run a billion-dollar business

Maintained online store with AWS, Shopify, WooCommerce with heavy online traffic

Extracted data to make reports on sales & growth etc.

Often delivered speeches in Chinese/English to make introductions or to participate in startup competitions for the company
